ABOUT THE HYPOXIA WORKSHOP

The Hypoxia Workshop is designed to bring together subject matter experts and operators of hypobaric and normobaric hypoxia training equipment to share practical insights and experiences. Focused on the physiological and cognitive impacts of low-oxygen environments, this workshop aims to establish best practices and generate valuable recommendations for future Hypoxia Training.

Attendees will have the opportunity to discuss evolving practices, address common challenges, and contribute recommendations that will shape advancements in Hypoxia Training. With a focus on real-world application, the Hypoxia Workshop serves as a valuable opportunity for military and civil stakeholders to deepen their understanding of the factors that impact pilot performance and safety at high altitudes.

We look forward to sharing key findings and insights during the main programme of the Human Factors and Pilot Training Symposium.

QUICK FACTS

- Location: Imlauer Hotel Pitter Salzburg
- Date: 23 June 2025, 14:00–17:00 hours
- Workshop Registration: human-factors-symposium.com
- Workshop is part of the Human Factors and Pilot Training Symposium 2025, for which you need to register separately
